## HOW IT WORKS

## WHAT IS MICROBAN®

Microban® is patented technology that inhibits the growth of bacteria, mold and mildew, keeping your playground cleaner and safer for children.

- Antimicrobial agents are integrated into the blades of the turf during the manufacturing process.
- This integration ensures that the patented technology never washes off or wears away - staying active for the lifespan of the product.
- By inhibiting the growth of bacteria, mold and mildew, cleaning and maintaining the surface becomes even easier.
